

Gustavo Domínguez

Business Operator | Operations, Automation & AI for Founders

Caracas, Venezuela | Remote — available for US time zones | +58 414 139 0145 | gndg89@gmail.com | [linkedin.com/in/gustavodominguezg](https://www.linkedin.com/in/gustavodominguezg)

PROFESSIONAL SUMMARY

Business Operator with 10+ years running day-to-day operations as a founder and operations lead — not supporting the business, running it. Built and scaled two companies from zero (an urban logistics venture and a portfolio of AI-powered SaaS ventures), owning budget, team, vendors, and the operating cadence end-to-end, with only the calls that truly needed someone else's judgment going up the chain. Turn manual, repetitive processes into automations using AI tools (Claude/Anthropic API, FastAPI, WhatsApp-integrated virtual agents), delivering measurable results without adding headcount — including a 330% weekly patient-volume increase for a one-person dental practice scaled from zero in under 2 years, and a 138% productivity gain for an agro-industry operation. Fluent bilingual communicator (English/Spanish) with a background in international business from Florida International University.

WHAT I OWN

- Operating Cadence & Accountability
- Team Management & Recruiting
- AI & Workflow Automation (Claude, FastAPI)
- KPI Tracking & Executive Reporting
- Client, Vendor & Partner Relations
- Problem-Solving Under Pressure
- Strategic Projects, Idea to Shipped
- Budget, P&L & Vendor Negotiation
- Bilingual Communication (EN/ES)
- Cross-Functional Execution
- SOP Documentation
- Decision-Making Without Hand-Holding

PROFESSIONAL EXPERIENCE

Business Operator / Founder

Independent Ventures — LegalTech, HealthTech, PropTech, AgTech, FinTech · Caracas, Venezuela | Jan 2025 – Present

- Operated as the day-to-day owner across 5 AI-powered ventures at once: set the operating cadence, scoped strategic projects end-to-end, and made the daily calls so each venture kept moving without anyone checking in.
- Took ambiguous asks — "grow patient volume," "get a legal SaaS live" — from idea to shipped result: defined requirements, built with technical partners, and reported back in clear, numeric terms.
- Ran a one-person dental practice's entire patient-intake operation end-to-end: designed and deployed a WhatsApp-based AI virtual agent for scheduling and follow-up, replacing manual intake and driving a 330% increase in weekly patient volume for a practice scaled from zero in under 2 years.
- Directed the AI-driven rollout of a farm-management system for an agro-industry client, coordinating technology vendors and end users directly — a 138% increase in daily production with no added headcount.
- Owned the business case, requirements, and cross-functional coordination between technical and legal stakeholders to take Causis (causis.legal), a 9-module legal-tech platform, from concept to MVP.
- Built and monitored KPI dashboards (CAC, MRR, retention, churn) across ventures to keep every decision grounded in numbers.

Founder & Operator

Xpeedy — Urban Logistics · Caracas, Venezuela | Oct 2020 – Feb 2024

- Founded and personally ran the business day-to-day: operations, team, budget, vendor relationships, and corporate client accounts, with full P&L ownership — no board, no safety net.
- Recruited, onboarded, and managed the operating team; built pricing, cost structures, and delivery workflows from scratch.
- Owned the numbers: built KPI tracking for delivery times and customer satisfaction and used the data to fix what wasn't working.

- Represented the business directly with B2B partners and corporate clients — handled the relationship personally, with no layer between the decision and the client.

Business & Marketing Coordinator

LEGA Abogados · Caracas, Venezuela | Jan 2019 – Mar 2020

- Ran business-development projects end-to-end: client acquisition, proposals, and campaign KPI tracking, reporting results directly to firm partners.
- Mapped and documented internal processes, found the bottlenecks, and led the fixes that cut administrative overhead.
- Consolidated data from multiple sources into executive-ready summaries for strategic planning sessions.

Administrative & Business Analysis Assistant

Santa Barbara Airlines & PAWA Dominicana (Grupo Condor) · Miami, FL | Oct 2015 – Feb 2018

- Coordinated administrative workflows for a multinational operation spanning 8 countries, keeping regulatory and operational compliance on track.
- Supported fuel-cost management and strategic operational planning with data analysis and reporting.

PROOF OF WORK

- Dental Practice Digital Operation: One-person practice, under 2 years old. Built the AI intake system myself; +330% weekly patient volume over baseline.
- Agro-Industry AI Rollout: Coordinated vendors and end users for an AI farm-management system; +138% daily production, zero added headcount.
- Causis (LegalTech SaaS): Owned the project from business case and 9-module scope definition through MVP, including go-to-market and competitive strategy.

EDUCATION

- Bachelor of Business Administration (BBA), International Business — Florida International University (FIU), 2015
- Associate in Arts (AA), Business Administration — Broward College, 2013
- Google Data Analytics Professional Certificate — Google / Coursera
